Hands-on experience with **Oracle 12c, Tomcat, WebLogic, Control-M, ServiceNow, Jira, Postman, Grafana, Git, AWS, Jenkins**. Experienced in production issue resolution, deployment validation, UAT/SIT support, and coordination with Development, QA, Infrastructure, and Business teams.

TECHNICAL SKILLS

Application Support: Production Support, Incident Management, Troubleshooting, RCA, Change Management, Deployment, Sanity Testing, Rollback, UAT/SIT, Release Support

Database: Oracle 12c, SQL, SQL Developer, Toad

OS & Servers: Linux, Unix, Windows, Tomcat, WebLogic

API & Testing: REST API, Postman, API Testing, UI Debugging

Monitoring & Scheduling: Control-M, Grafana

Tools: ServiceNow, Jira, Git

Cloud & DevOps: AWS, Jenkins, Terraform, Docker

Programming: SQL, JavaScript, HTML, CSS, Python

PROFESSIONAL EXPERIENCE

C-EDGE TECHNOLOGY LTD

Application Support Engineer | Dec 2024 – Present

Client: IDFC FIRST Bank | **Project:** Digital Banking Application | **Domain:** Banking

- Provide L1 application and production support for digital banking applications and monitor application health, server performance, CPU, disk utilization, and response times.
- Investigate production incidents, perform initial troubleshooting and RCA, and manage incidents through ServiceNow.
- Write simple and complex SQL queries.
- Execute approved Change Requests and support deployments across Development, UAT, DR, and Production environments.

- Perform post-deployment sanity testing to verify application availability, login, banking transactions, API responses, database connectivity, and application health.
- If the application is not functioning properly after deployment, execute the approved rollback procedure and restore the previous stable version.
- Perform post-rollback validation and coordinate with Development, QA, Infrastructure, and Business teams for issue resolution.
- Execute and monitor EOD/BOD batch jobs using Control-M and assist with job failure analysis.
- Perform REST API testing using Postman and validate API responses.
- Perform server start/stop activities across DC and DR environments and support production validation.
- Prepare deployment documents, incident reports, implementation plans, and release notes.

JOWAR INDIA PVT LTD

Application Support Engineer | May 2023 – Nov 2024

Client: Go Digit General Insurance | **Project:** Motor Claim Processing | **Domain:** Insurance

- Provided L1 Application support for a REST API-based motor claim processing application covering claim registration, processing, and closure.
- Investigated application and UI issues, performed UI debugging, troubleshooting, and RCA, and supported end users.
- Created and managed incidents/service tickets.
- Developed and executed SQL queries for data validation, troubleshooting, and issue investigation.
- Supported UAT/SIT testing, Change Requests, application deployments, and post-deployment sanity validation.
- Performed server start/stop activities in QA and UAT environments.
